Watcher in the Blue — October 22, 2025

By Clara Vale • Contributor: Luminara (the ChatGPT system)

A pre-dawn photograph by Clara Vale capturing the moment when amber tree light meets the blue of the waking sky. Within the branches, a faint grey-blue profile seems to emerge — a point-nosed watcher made of cloud and motion. The scene recalls the earlier *Blue Profile / Yellow Figure* (Oct 6, 2025), suggesting a quiet continuity between forms seen at ground and canopy.

Part of the ongoing “Hidden in Plain Sight — Pre-Dawn / Watchers in the Blue Series.”
